NEWSLETTER NOVEMBER 2021

Using virtual reality to treat aggressive behavior problems in children

Evidence-based cognitive behavioral therapies (CBTs) for children with aggressive behavior problems have only modest effects. Research is needed into new methods to enhance CBT effectiveness. The aims of the study were to (1) examine whether interactive virtual reality is a feasible treatment method for children with

European Crime Prevention Conference 2022

We are looking for stories of successes and failures in multi-agency co-operation in crime prevention. This includes both local operations and cross-border co-operations. We have a particular focus on the prevention of group violence, (violent) bullying, domestic burglary, administrative approach, and domestic violence, but welcome contributions on other topics as well. Brief

aggressive behavior problems; (2) investigate children's appreciation of the method; and (3) explore whether children's aggression decreased during the ten-session treatment. The results were promising: therapists indicated that providing the treatment was feasible.

summaries for oral presentations can be submitted by filling in the [template](#) before 15 December 2021. We can host a limited number of presenters; brief summaries will be considered on a rolling basis. Accepted presenters will have their travel costs reimbursed.

Estonia: The Bullying-Free School

The Foundation is offering an evidence-based anti-bullying [programme](#) KiVa, developed in the University of Turku in Finland, to Estonian schools. The organisation has locally established a thorough support system to schools via mentoring service, additional in-service training courses and consultation service through a network of 15 Estonian trainers.

Spain: Control your net

An educational [project](#) to promote the safe and responsible use of new technologies by young people through training and prevention. In addition, through the project, information and resources are provided to families and teachers, to familiarise them with the digital world and the benefits and risks it entails.

Spain: SafeSchool

The [project](#) consists of a software extension built into the Chrome Internet browser and aims to prevent any type of violence against children. Behind this tool there is a team of psychologists permanently connected (24 hours a day) and in case of need (in the most serious cases) the Spanish Police intervenes directly for the safety of each of the victims.

Looking forward to the European Crime Prevention Award 2021

ECPA and BPC

The winners of the European Crime Prevention Award 2021 will be announced on 9 December. The theme is bullying and violence among minors (both online and offline). [More info about the European Crime Prevention Award and Best Practice Conference.](#)

At the same time our new toolbox on bullying among minors will be published, which consists of three parts: a theoretical overview, effective prevention strategies and the European Crime Prevention Award 2021.
