

NEW INSIGHTS INTO EVALUATION EFFORTS

Jorne Vanhee
Research Officer

This session

- The EUCPN and evaluation
- Evidence-based crime prevention, International Centre for the Prevention of Crime
- Campbell Collaboration Systematic Reviews: what works in preventing crime, terrorism and radicalisation
- Experiences of the Members States performing evaluations in projects and activities aimed at crime prevention

Time to
evaluate

01 TOOLBOX: EVALUATION OF CRIME PREVENTION INITIATIVES

01 Toolbox

- Minimum standard
- Why evaluate?
- Paradox of evaluation
- Evidence-based

01 Toolbox

- Planning and designing
- Data collection and analysis
- Communication of results
- From the start & continuously
- Process and impact

02

QUALIPREV

02 QUALIPREV: process indicators

- Costs
- Programme fidelity
- Accessibility
- Feasibility
- Participation rate
- Retention rate
- External confounding factors

02 QUALIPREV: impact indicators

- Situational: decline in recorded crime, decline in victimization,...
- Social: self-reported offending, increased social skills,...
- Universal: level of recorded crime, reported offending,...
- Selective: level of recorded crime, reported offending,... within risk group
- Cybercrime: decline in opening fraudulent links, increase of using password managers,...
- Property crime: decline in attempts, less financial losses

03 AN INCONVENIENT TRUTH

03 An inconvenient truth

- Process evaluation \neq impact evaluation
- Knowledge transfer \neq behavioural change
- **Evaluation = innovation**
