

Project title:

Conception European Methodical Centre.

Main theme:

The submitted project of EMC is primarily aimed at system analyses of social protection of eurozone countries, on the grounds of these analyses there will be proposed by experts a highly developed, permanently sustainable (with regards to real possibilities of individual countries) unified system of social protection. This proposal will be reminded by social workers working with clients directly on location. The intention of developing this type of system of social protection is to unify national and international procedures for solving social problems and to look for common interests that would be beneficial for promoting positive social change and for maintaining citizens' well-being.

Project purpose and outcome (in two sentences):

The main objective of methodical function of the Slovak headquarters of EMC, in close cooperation with other branches of EMC which will be established by strong cooperation with ICSW Europe member organizations, will be **REAL CHANGE** of social situation of citizens in a sense of supporting and developing citizens' well-being in terms of real possibilities of individual countries by the use of all legal matters which that are available to non-governmental and nonprofit organizations (III. sector) with the intention of equalizing social status of EU citizens as well as eradicating social conflicts. From SKTS and ICSW Europe' view this is the most effective preventive action in the field of primary, secondary and tertiary crime prevention.

Project submitter (Member State):

Slovak Republic

Project leader(s):

Stála konferencia organizácií III. sektora Slovenskej republiky (SKTS SR)

Project partner(s):

International Council on Social Welfare Europe (ICSW Europe)

Project description:

An expert analysis of theories, methods, approaches and activities realized by all subjects in terms of social protection in the past (prevention, security, health-care, emergency), an analysis with emphasis to specific data extraction which can be used for building a conceptual, sustainable, just - and within countries of EU - socially unified system.

The second step is reevaluation of the proposed system in close cooperation with experts. The selection of experts from EU member countries will be realized in cooperation with ICSW Europe member organizations and focus will be put on a high level of achieved social work competency.

The final step will be to present the proposed system of social protection as the most crucial preventive measure in the field of primary, secondary and tertiary crime prevention by the use of all legal means which are at non-governmental and nonprofit organizations' (III. sector) disposal.

Objectives project:

The main objective of the project is, on the grounds of common values of good, complexity, complementarity, justice, adequacy and subsidiarity, to achieve the highest possible degree of EU citizens' well-being and that by unifying national and international solutions for social problems and by looking for mutual interests to support positive social change as the most crucial preventive measure in the field of primary, secondary and tertiary crime prevention.

The objective of the project is also to ensure, support and realize creation of informative-communicative environment beneficial and incentive for experts of all professions from I., II. and III. sectors and this way to contribute to building a unified, effective, continually set, feasible and sustainable social system in EU.

In this informative-communicative environment EMC in close cooperation with ICSW Europe intends to carry out projects focused on increasing employment opportunities, increasing moral and work ethics, creation and realization of programs and educational projects aimed at improving quality of life, work, cultural, artistic and social environment as well as countryside development on local, regional, nationwide and international levels.

Project outcome:

- Recommended changes in the systems of social protection in EU countries,
- Models of community project solutions proving feasibility of the proposed system of social protection,
- Proposal and realization of the conception of social protection for Smart CITY Telematic Laboratory project, carried out by the Research institute Smart CITY in Prague, which assists developmental countries with population stabilization and prevention of unwanted migration due to economic reasons,
- Practical realization of proposed solutions realized on the basis of results collected from researches and analyses conducted in Slovakia and other EU countries including support and protection of witnesses and victims as well as other fields of social work,
- Retraining of experts in the field of social work (I., II. and III. sector) including supporting the rights and protection of witnesses and victims on all levels with focus on more particular and more effective practical activity in prevention against crime, based on our international experience,
- Real change of EU citizens' social status proving to be the most effective means of crime prevention.

Start and end project:

as soon as possible - begin + 6 years

Timescales and key milestone dates:

Supposing the project would commence in January 2016:

January – November 2016

Research of history of social work, education in social work and performance of student and expert practical training (based on qualitative and quantitative research)

May 2017

Work on creating the proposed system of social protection together with finalization of the practical training manual for all levels (student practical training, practical training in I., II. and III. sectors)

October 2018

Processes related to applying theory into practice on all levels.
(Applying Theory into Practice)

December 2019

Selection of project solutions on local, national and international levels and their realization under the methodical direction of EMC (Focus on Change)

December 2020

Evaluation of researches and effectiveness analyses of implemented actions including statistical data and analyses of success rate of project solutions on all levels (Focus on Outcome)

December 2021

Finalization of analyses and subsequent implementation of proposals for adjustments – reality-based – tuning = permanently sustainable, conceptual and continually set, just, unified, effective, demonstrably feasible system of social protection for EU member countries as the most effective and most efficient preventive measure in the field of primary, secondary and tertiary crime prevention.

Funding (total budget and type of funding (e.g. ISEC, EUCPN Fund,...)):

25 000 000€ (ISEC, Inaara, ESF)
