Based on the United Nations Convention on the Rights of the Child, the European Convention on the Rights of the Child, and the European Charter on the Rights of Persons with a Disability, the Council of Europe promotes and protects online society against cyber threats. The Council of Europe promotes and protects online society against cyber threats.

The PROTON project is a 27-month project funded by Horizon 2020, which is the biggest research framework program. The PROTON project will cover 28 EU Member States. The project will develop forecasting systems to predict the evolution of mafia and terrorism groups. The PROTON project will forecast the growth of criminal and terrorist organizations and to test different types of action to prevent and control their activities. The PROTON project will also implement the RJ-related articles of the Victims Directive in all MS are discussed. The research report and additional material is available here.

The IVOR project is an ambitious programme aiming at aligning and strengthening national and European policies and practices as well as support technical assistance that facilitates the implementation of the EU restorative justice-related articles of the Victims Directive. The project focuses on restorative justice actions, such as restorative justice conferences, support services, and other activities that help to align and strengthen the joint efforts of EU law enforcement and its partners in preventing and controlling the activities of criminal and terrorist organizations. The final three chapters address three sub-priority areas of cybercrime (cyber attacks, child sexual abuse, and Other Drugs). The analysis contained in the Paper was complemented by three economic studies. The importance of the prevention related to this vulnerable group of people.

Transparency International and our national Chapters and partners have closely analysed the importance of the prevention related to this vulnerable group of people. The research report and additional material is available here.

Further developing the Sex Offender Risk Assessment and Management (SORAM) Project and its implementation in various countries, including the United States, Germany, and Canada, are discussed in this paper. The SORAM Project is a multi-disciplinary approach to risk assessment and management of sex offenders. The SORAM Project is designed to help reduce the risk of re-offending by sex offenders and to protect the public from sexual violence and sexual abuse. The SORAM Project is implemented in various countries, including the United States, Germany, and Canada, and is based on scientific and grey literatures, national and international data, and grey literatures.
