6. Short summary of the project

Project "Threats on the Web - Prevention, Reaction" implemented in its initial formula in primary schools among students of grades 4-6 and their parents and teachers, over time had to respond to emerging - cyber threats. His formula has been widened, and so it is currently addressed to primary school students of grades 4-8, their teachers and parents (all levels - classes 1-8), students of excluded gymnasiums and their teachers and parents, as well as other educational institutions, among others industry schools, high schools, technical schools.

Beneficiaries of the project, in addition to the knowledge they are given, are also equipped with preventive materials that correlate with the assumptions of the activities undertaken.

The multidimensional character of the project is also emphasized in encouraging young people to use the space of the physical world - being offline. We promote a healthy lifestyle through physical activity, which is associated with participation in outdoor events.

## 7. Project description

In May 2012, police officers from the Prevention Department of the Voivodship Police Constabulary in Krakow took part in the meeting of the Health Protection Committee of the Lesser Poland Regional Assembly, where they presented an idea for the implementation of educational activities in Lesser Poland, covering the area related to cyber threats. The project addressed to primary school children arose as a "response" to the demand reported by teachers and parents. After the meeting, the Health Protection Commission of the Regional Assembly of the Lesser Poland, a decision was taken to start implementing the abovementioned project under the name "Threats in the network - prevention, response".

In the fourth quarter of 2012, the Department of Prevention of the Voivodship Police Constabulary in Krakow began pilot project implementation in three poviats of the Lesser province: Tarnów, Nowy Sącz, Myślenice, and also in the city of Krakow.

From January 2013, the project was extended to all poviat and city police headquarters of the province Malopolska - ultimately the project is to cover all of them primary schools in Lesser Poland. The project's addressees are children of grades 4-6 of primary schools as well as their parents and teachers.

As part of the project, ten training conferences were prepared by the Prevention Department of the Voivodship Police Constabulary in Krakow together with the Marshal Office of the Malopolska and the Research Institute "Science and Academic Computer Network". Policemen from Police Commissariats - Poviat / District Police Headquarters and from the Voivodship Police Constabulary (juvenile and district specialists) participated in these conferences, and their aim was to improve professional and didactic competences implementing the policemen project - almost 100 policemen participate in the training each year.

The project also implemented three advertising spots addressed to students, as well as to parents and teachers. The policemen implementing the project joined in their preparation. The spots were broadcast on public transport in Krakow, in some of the cinemas before film screenings, and are used by police officers as auxiliary material during meetings with children and their parents.

Policemen conduct meetings with children, during which they use the preventive and educational materials developed by NASK, including: "Adventures of Plik's and Folder" for children, brochure "Excessive use of computer and Internet by children and young people", Leaflet, poster, guide and the brochure "Controlled purchase", film and audiobook "The Adventures of Plik's and Folder on the Web", the educational package "Become your child's friend", the film **"Sheep in the Net"**

As part of the project, on September 20, 2013, the Declaration on cooperation was signed between the Marshal's Office and the Voivodship Police Constabulary in Krakow, updated on January 29, 2014 with a Declaration on cooperation between the Board of the Malopolska Province, and Voivodship Police Constabulary in Krakow and the Krakow Academy. The inclusion of the academic environment in the project is aimed at ongoing monitoring and evaluation of the

project in terms of defining the directions of its development in the following years. After more than two years of implementation of the above-mentioned project the university "left" the project. The project enjoys a very good reception especially in the group of parents, which is a phenomenon of previous preventive activities carried out in the area of safety of children and teenagers.

## 8. Project objectives

One of the main goals of the project is to show how to use the Internet efficiently and safely, how to respond to online threats and how to avoid it. Our activities are aimed at limiting the occurrence of cyberbullying among children and youth and related cyber threats, as well as exposing children and young people to victimization in the online space.

Another of the important goals is to for teachers, pedagogues, psychologists and parents and guardians of children and youth with knowledge and competences that allow to recognize and counteract cyberbullying and cyber threats.

Children and teenagers were covered by multi-segment training at various stages of their educational process. Parents and teachers familiarized with the created "Procedures" for dealing with the perpetrator, victim of cyberbullying, as well as methods of securing "cyberevidence".

New preventive goals related to emerging cyber threats are set, i.e. Blue Whale Challenge, Momo doll, etc.

## 9. Project outcome

From the beginning of the project "Threats on the Web - prevention, response", the policeman met with:

- 372930 students (11424 meetings)
- 61440 parents and guardians (1407 meetings)
- 30201 teachers, educators and psychologists (7380 meetings).

In 2018 as part of the project, police officers visited 1204 primary schools, in which they met with

72 412 students (2 228 meetings), 10 545 parents (159 meetings) and 5 780 teachers and pedagogues (1 714 meetings).

And apart from, the policeman in the implementation of the above project, they reached with its assumptions for kindergartens, junior schools, high schools, technical schools, as well as parents, guardians and teachers of children and youth attending the 409 aforementioned. institutions. In 2018, policeman officers met during 655 meetings with 22 240 students (children and youth), 45 meetings with 2,110 parents (carers, seniors), 478 meetings with 2099 teachers (pedagogues).

#### 10. Start and end project, timescales and key milestone dates

The project implementation began in the fourth quarter of 2012. The project is being implemented at the time, to date, due to the great interest it enjoys and the emerging new threats - challenges in the world of on-line as well as off-line .

#### 11. Funding (total budget and type of funding (e.g. ISEC, EUCPN Fund,...))

The project is financed by the Marshal's Office of the Lesser Poland. In the Office's budget so far, it was about PLN 200,000.

#### 12. Evaluation

Evaluation of the project "Threats in the Network - Prevention, Response" is planned for the years 2019/2020.
