Project submitter (Member State):

Hungary

Project leader(s):

National Crime Prevention Council

Project partner(s):

Police

Project description:

The National Crime Prevention Council of Hungary (NBT) tries to transfer new knowledge to people not only in a traditional way but also in an interactive, playful form. Uniquely in Hungary, the new project of the NBT was created by a modern mobile technology. This new application is called „Házórző” (Homewatch). The program consists of a 3D game, a test which assesses the safety level of our property and also of a notebook about the protection of our home containing the most important information on the topic. The goal of the 3D game is to keep the burglar from breaking into a house by answering different protection related questions (e.g. What kind of fence does the house have? Is there an alarm in the house?) Depending on the responses the burglar gets closer and closer to the house. A questionnaire about the safety of our property is also part of the application. After answering the questions the application give suggestions on how to protect our home better.

The “Házórző” (Homewatch) application entertains, teaches, and helps the user at once. It can be used long-term and it can be developed as well. The application can only be downloaded in Hungarian from Google Play and from the App Store.

Objectives project:

We aimed to show the people the safety level of their homes and to encourage them to think about what they can do to increase this status.

Project outcome:

We have not started the official promotion yet; so far around 500 hundred people downloaded the application.

Start and end project:

The application is available on Google Play and App Store since July 2017.

Funding (total budget and type of funding (e.g. ISEC, EUCPN Fund,...)):

The application was financed by the National Crime Prevention Council.

Total budget: 13 627 100 HUF
